

ACT TWO:

DEPTH OF FIELD

“If only we could pull out our
brain and use only our eyes.”

Pablo Picasso (1881-1973)

I HAVE NOT
COME THIS FAR FOR
NOTHING.

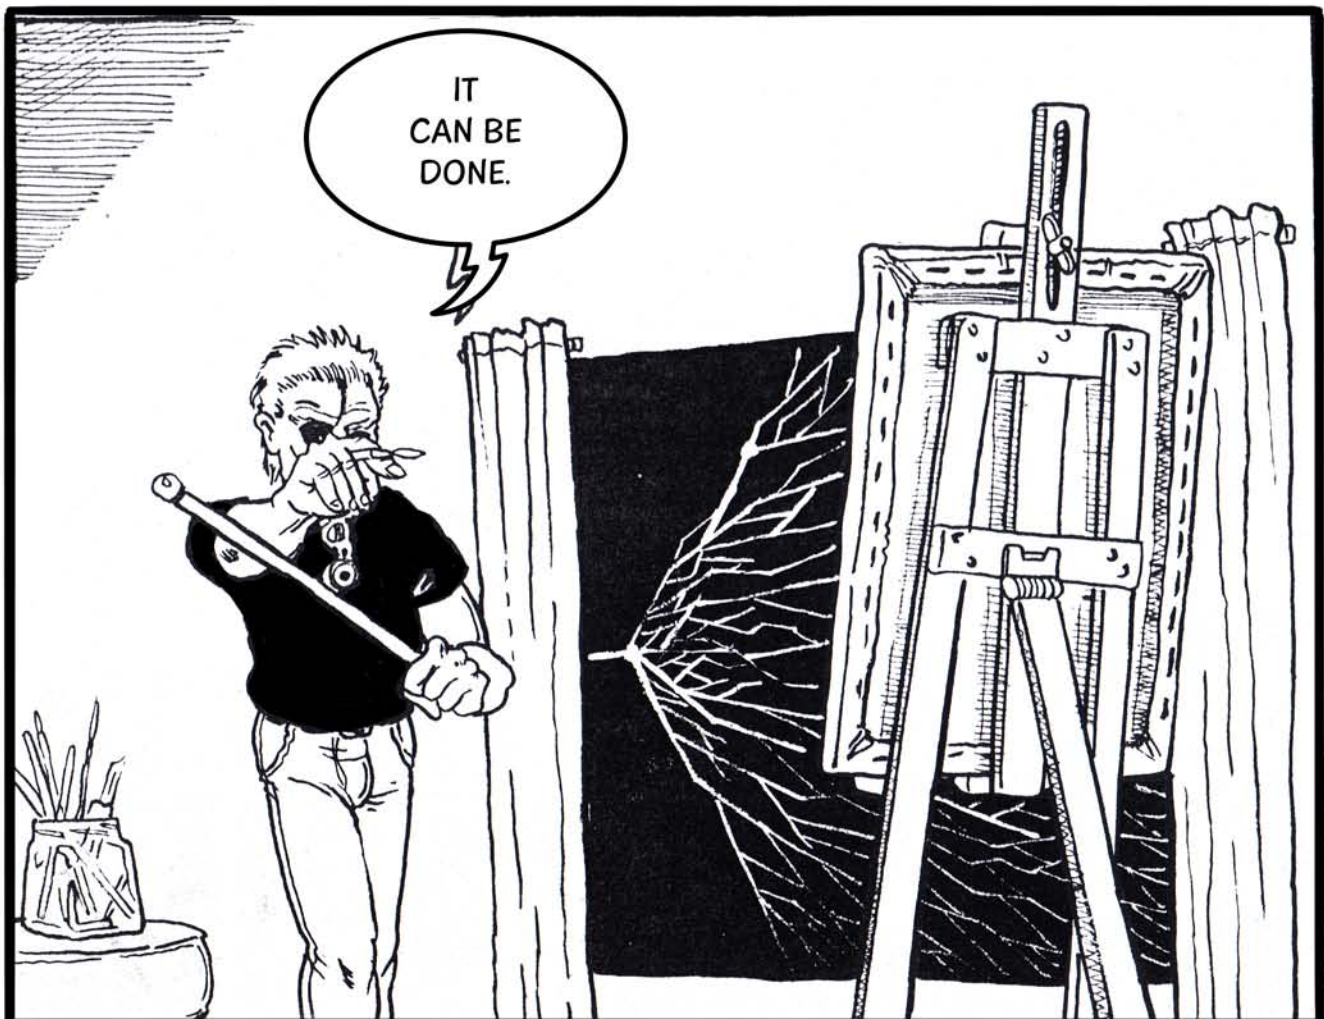

I
MADE
A
PACT...

...WE ALL DID...

...AND I
AM THE ONLY ONE LEFT
WHO STILL BELIEVES.

IT
CAN BE
DONE.

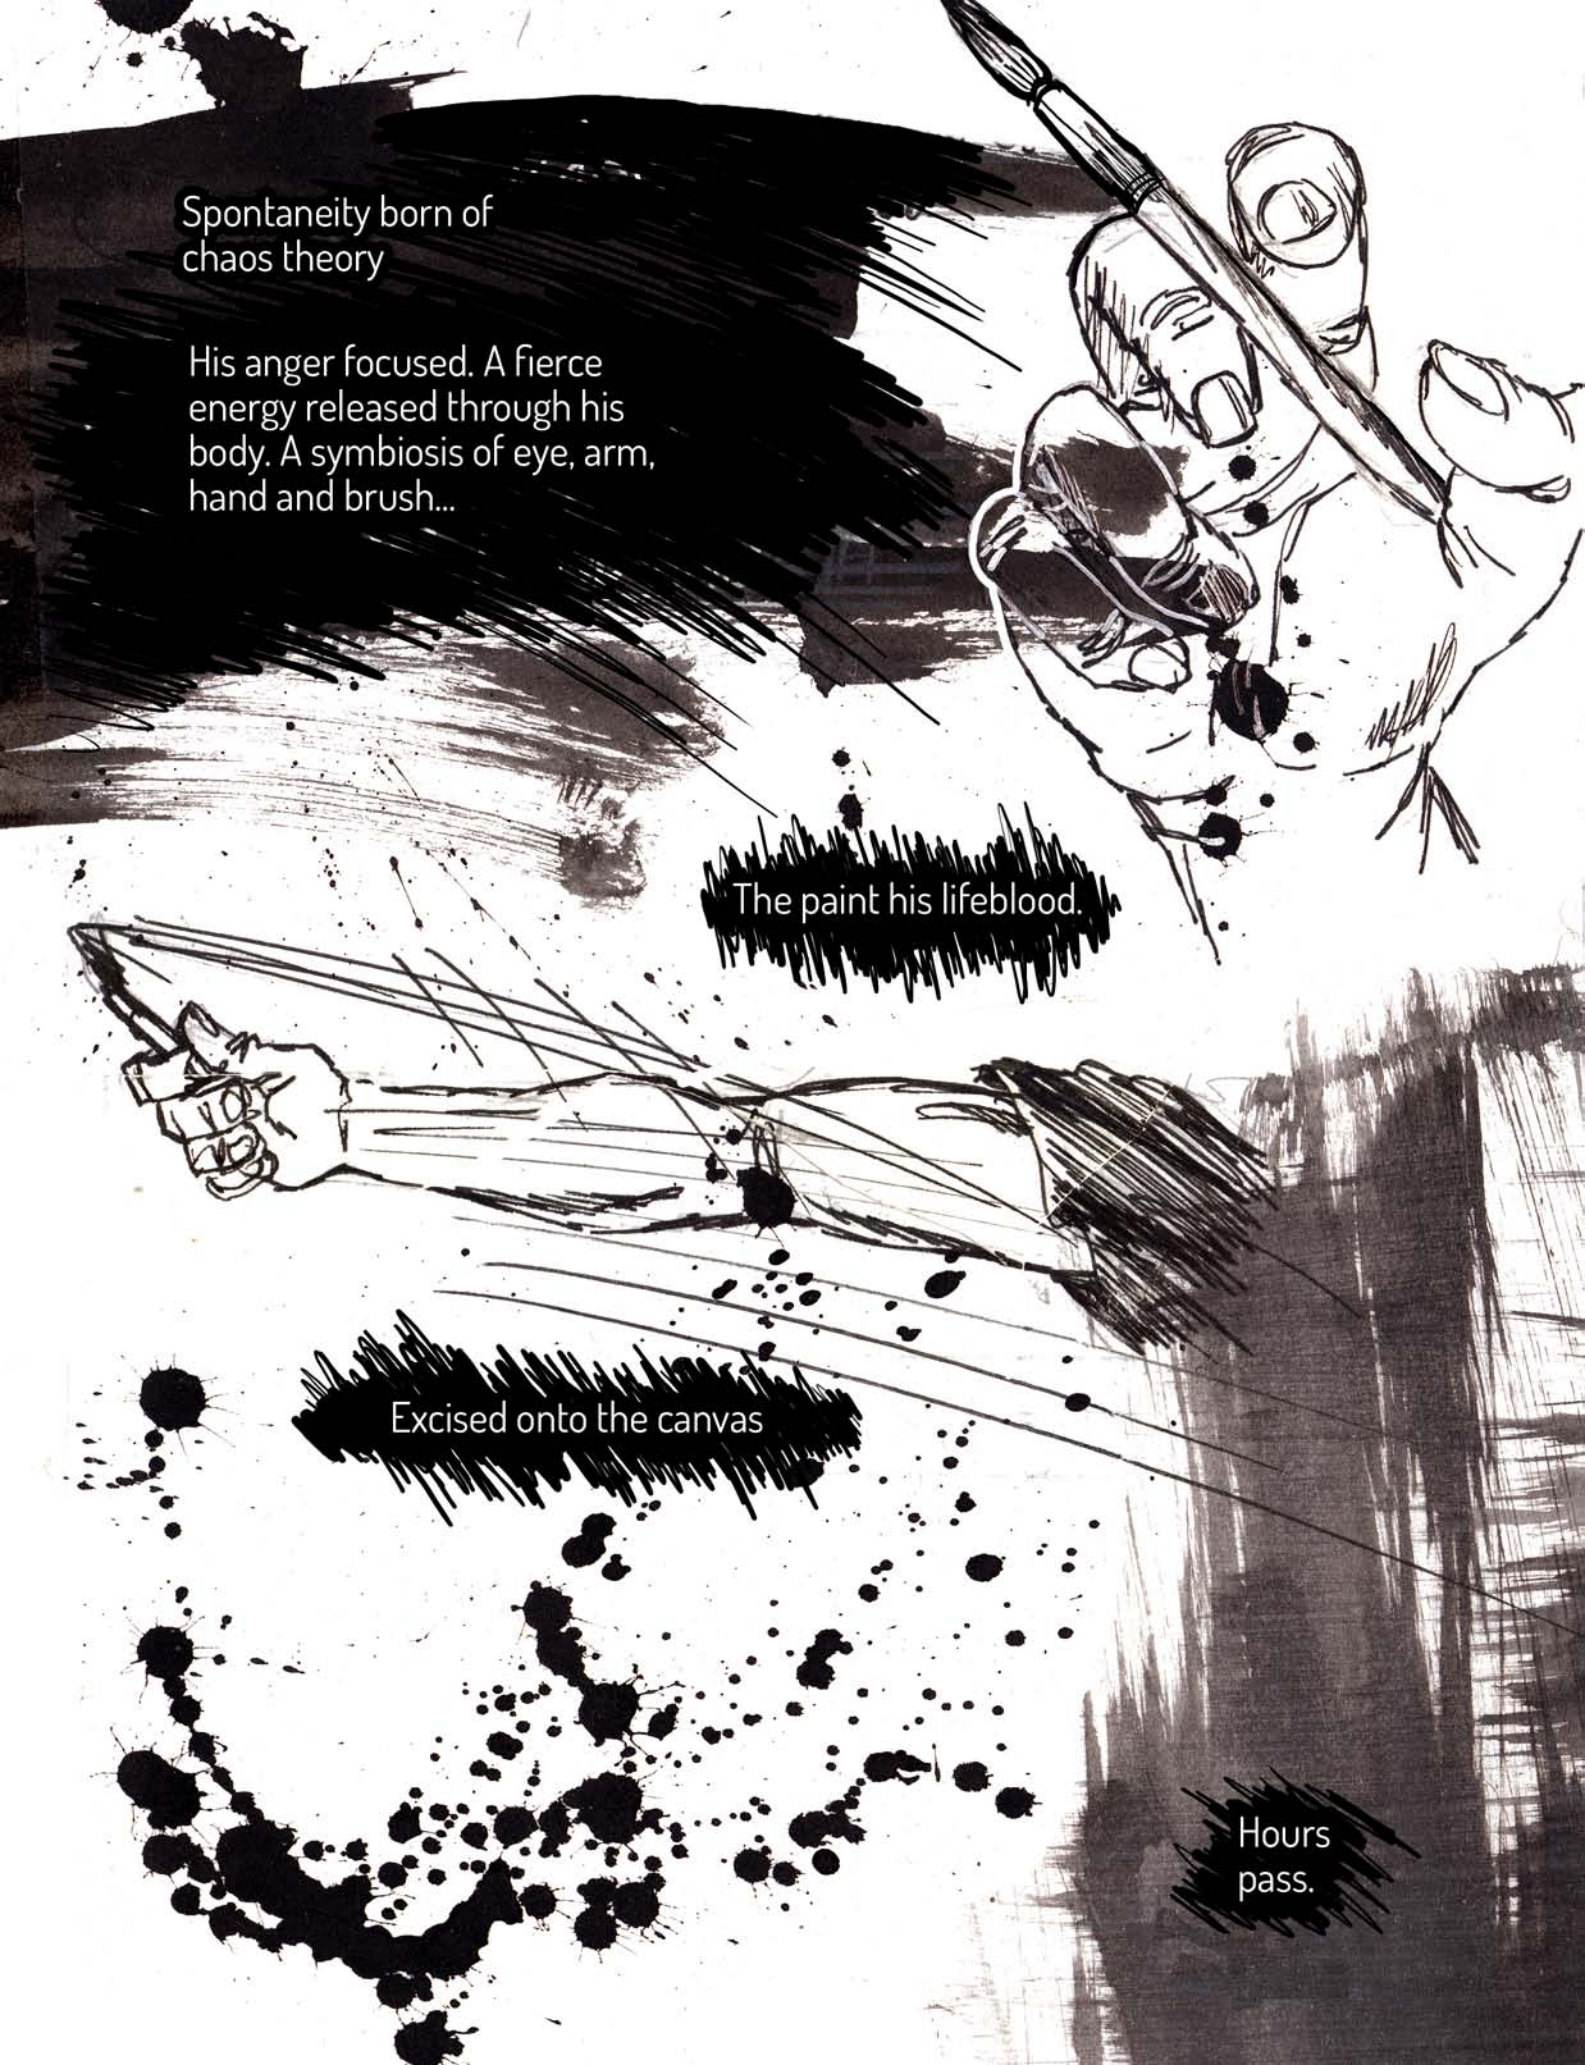

of those who are present within these walls
by the terms of this agreement entered into
all parties herein the year 1964 where a
resent in this place have a taken oath to
sue the endeavour laid out the followin

The 4.142 hand trimmed horse
hair brush makes contact with
the 220gsm paper at 43 degrees
at a pressure of 23,580,069.89
pascal units.

With architect's skill
he plots every mark,
lines and curves.

A blueprint of an image burned into his mind's
eye, his single eye, with mathematical precision.

Spontaneity born of
chaos theory

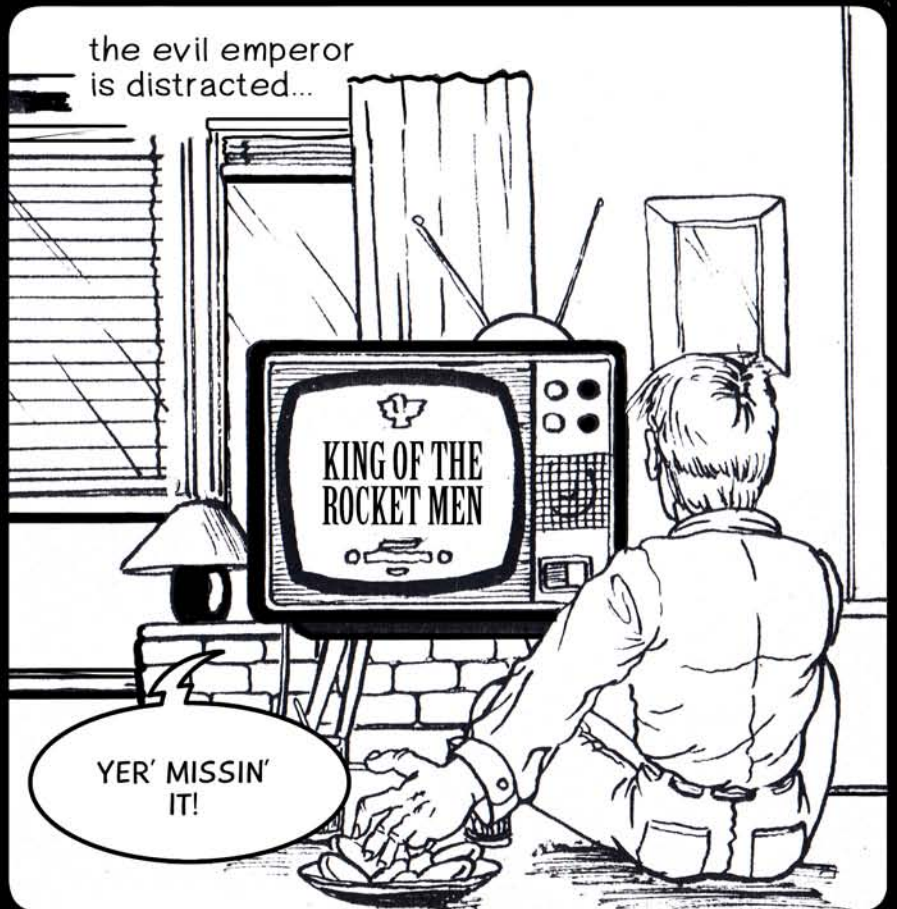

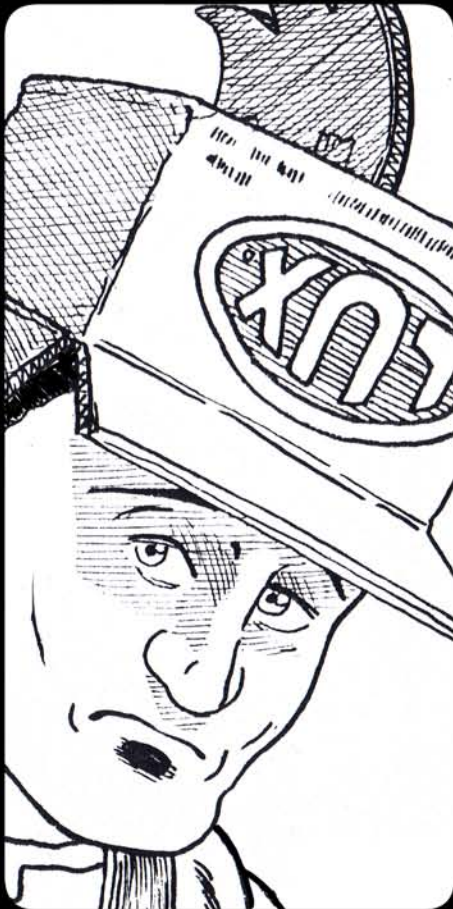

His anger focused. A fierce
energy released through his
body. A symbiosis of eye, arm,
hand and brush...

The paint his lifeblood.

Excised onto the canvas

Hours
pass.

The Past.

...time to STRIKE!

HEY!

YOU LITTLE
MONSTER!

...the palace
guards
prove no
match...

...for the captain's
quick wits...

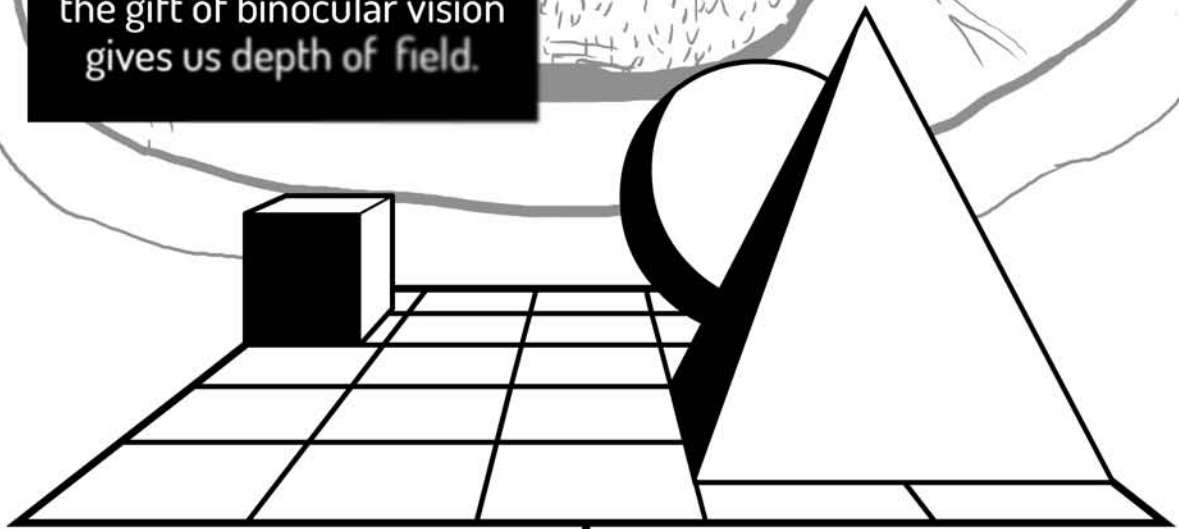

...and he escape's
the emperor's
palace dead easy
like!

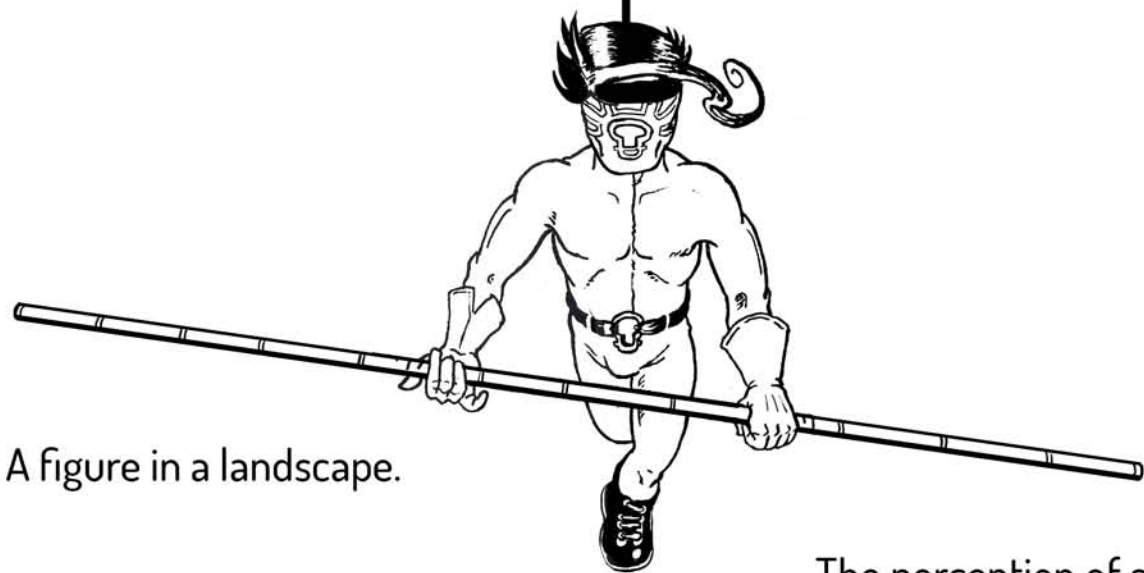

the gift of binocular vision
gives us depth of field.

To see what is near and far...

The distance from here to there

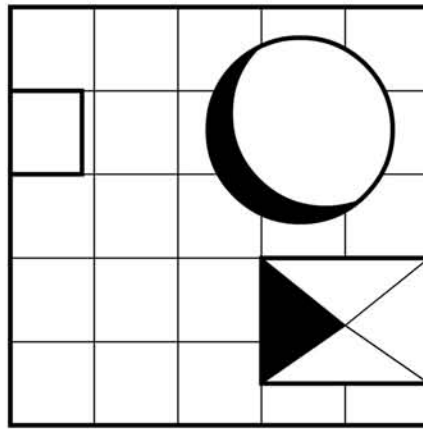

A figure in a landscape.

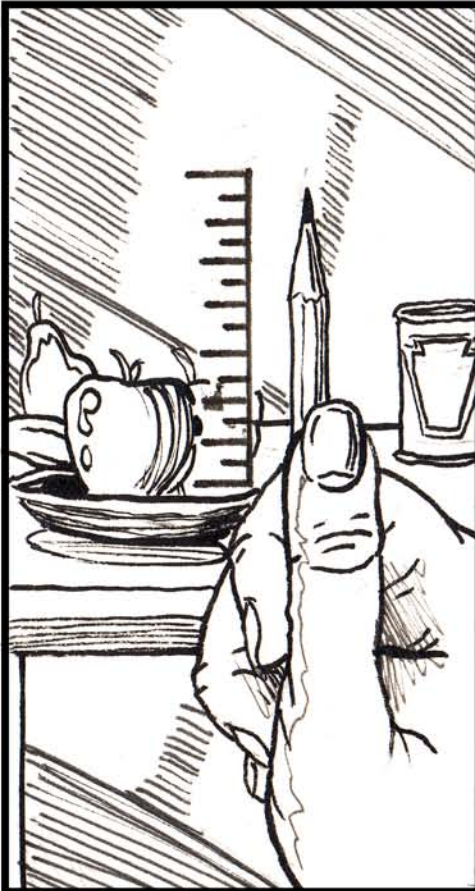

The perception of space.

Monocular vision gives us
the world of scales.

Invisible points can no
longer meet or vanish.
'here' and 'there' must be
measured in other ways.

A depth of field maybe
lost, but do not
underestimate the
world of scales, for
it is not finite.

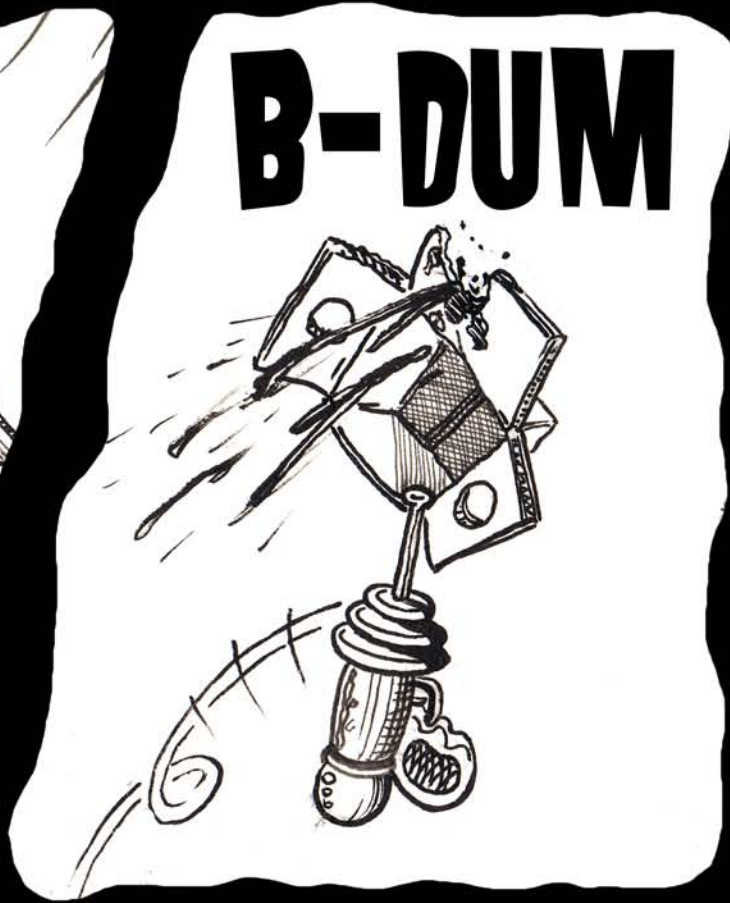

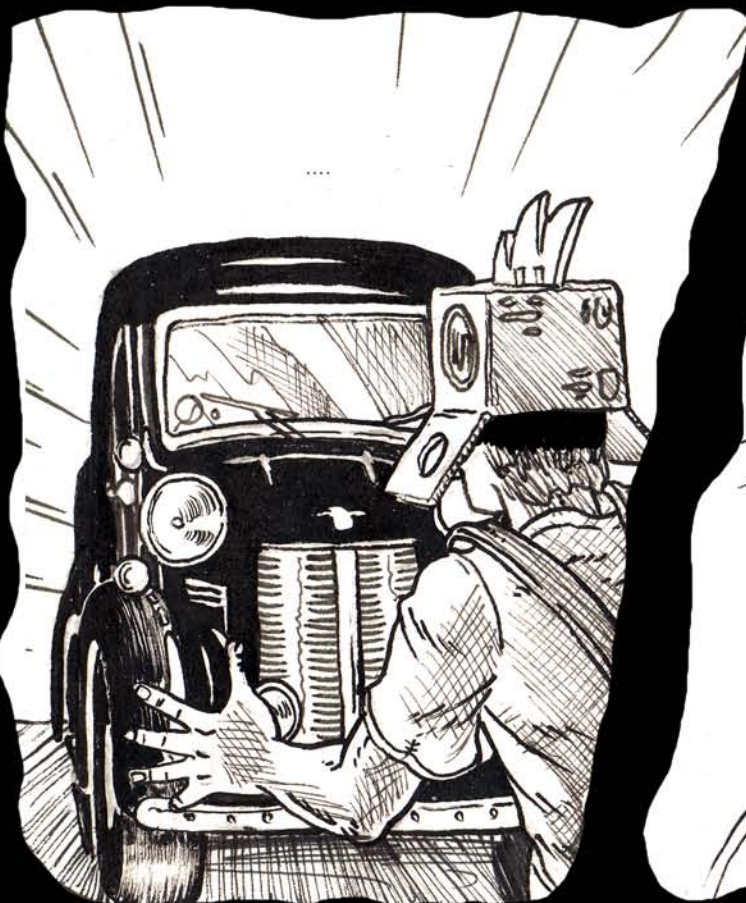

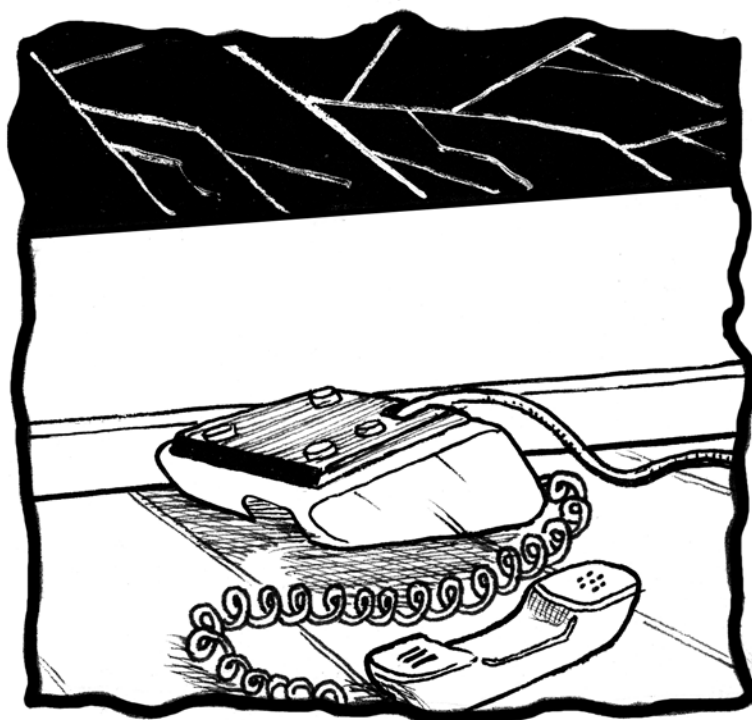

The mastery
of measurement...

...is a journey
without end.

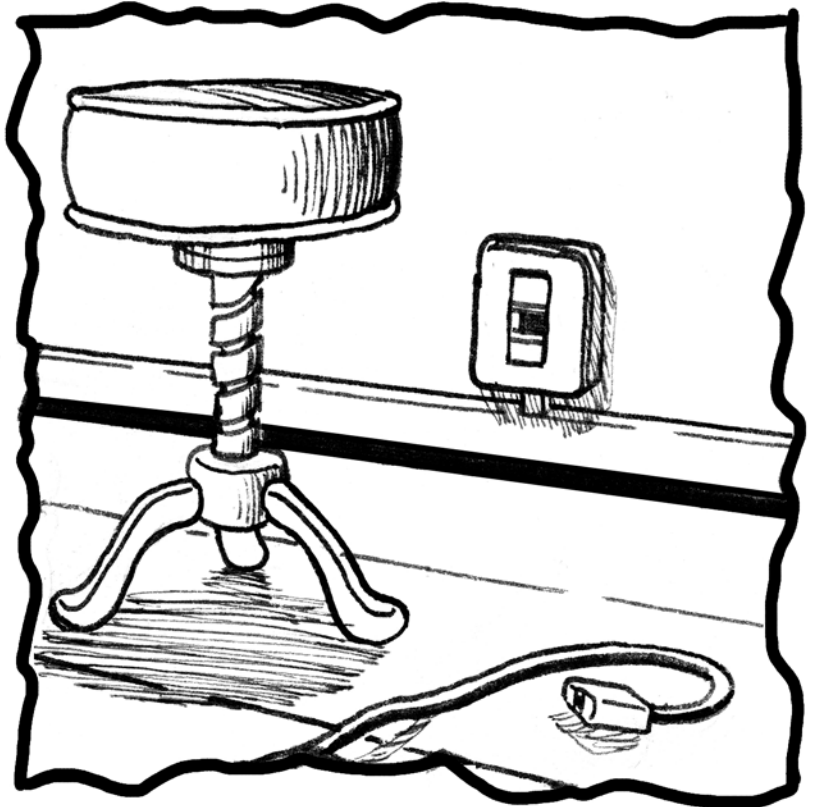

KEEP CALM
MAX! EVERYTHINGS
GOING TO BE
ALRIGHT!

"No broken bones,
but there is bad news..."

"Possibly a shard of glass from the
headlight, damaged the optic nerve
and the retina.."

"... Max is going to have to learn to
live with it."
